```
incrementCounterOfQueue(queue_t)
.a = 23.
                  getNameOfQueue(queue_t)
.b = "foo",
.c = &object2
                  popObjectFromQueue(queue_t)
```

```
increment()
.a = 23,
.b = "foo",
                getName()
.c = &object2
               nextObject()
```

```
.a = 23,
    incrementCounterOfQueue(queue_t)

.b = "foo",
    getNameOfQueue(queue_t)

.c = &object2
    popObjectFromQueue(queue_t)
```

Felder sind der Zustand

Das Objekt

.c = &object2

Methoden sind Nachrichten

nextObject()
